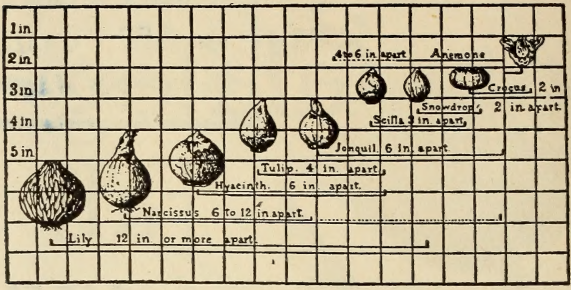
BOLGIANO'S FALL BULBS



HOW TO PLANT

OUTDOOR CULLTURE—Plant the bulbs as soon after September as possible to enable the roots to make good growth before the cold weather sets in. They can, however, be planted from September until the ground becomes frozen. They require a moderately rich soil, or else apply Bolgiano's Sheep Manure or Bone Meal. How far apart and how deep to plant the different bulbs is shown in the accompanying chart. When the ground freezes cover with 3 or 4 inches of leaves or dry litter. Rake off after frost.

INDOOR CULTURE—Plant hyacinths, tulips and narcissus in a sandy soil. Give a good soaking after planting and water once or twice a week during the time the bulb makes root. After planting keep in a dark place in the house and keep a paper bag over the pot until the sprout is about three inches long. They may then be brought to the light and bag removed.

GROWING PAPER WHITE NARCISSUS IN WATER—Place a dozen bulbs in a shallow bowl, cover with small stones and keep filled with water. Place a few small pieces of charcoal in the bottom of the bowl to keep the water from fouling. Keep in a moderately temperate room. They require no care, no attention. They keep on growing and produce a beautiful flowering plant.

THE HARDY PERENNIAL GARDEN

Year after year the hardy perennial garden is increasing in popularity. From early in April they continue to bloom with constant changing variety throughout the entire Summer and Fall. Once planted they appear themselves each year and do away with the necessity of annual seeding. Sown in late Summer or early Fall bloom next year. No garden is complete without a liberal space devoted to Hardy Perennials.

SWEET PEAS

Splendid results are often obtained from growing Sweet Peas in October or November. A perfectly drained soil so situated as not to be subject to too frequent or severe freezing should be selected, and the seed covered about 3 inches.

SUPERB EARLY OR CHRISTMAS FLOWERING SPENCER SWEET PEAS

These varieties are a welcome addition to our lists, for they flower several weeks earlier than the regular Spencers, and if planted with them you will have a much longer season of bloom.
